

# ST JOSEPH'S STUDENT NEWS

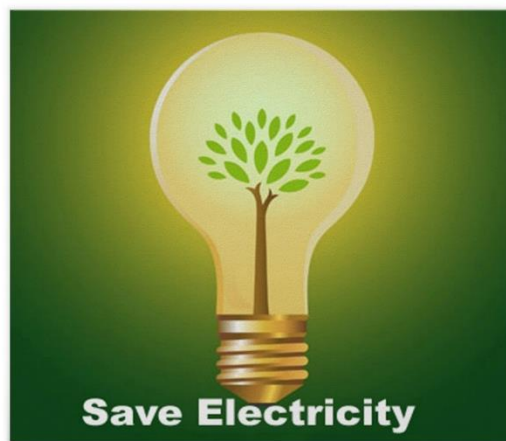

By Ben Hoffgen and Niamh Whelan

Thursday 11<sup>th</sup> October

We have been talking about the environment. During one of our assemblies, we talked about how to save our earth. This is important because the earth has not got limited resources.

Ways to help our earth could be to;  
Grow your own fruit and vegetables  
Try and use less electricity  
Recycle more  
Walk to school to help with pollution  
Turn off lights  
Not throwing waste on the streets.

Which of these could you do to help?

Help save the world by using less electricity.

No play fighting.

A little message from Mrs.Glossop

Play fighting is not permitted on the school grounds. We have had a number of injures from this.

As top of the school, KS2 should set an example to KS1 by not taking part in this kind of play. If you see someone playing irresponsibly, please tell an adult on the playground.

Reminders from Head boy head girl.

Remember stack your plates and chairs.
